Viking ProBowl

Professional Power

The Viking ProBowl is a manually operated ball-valve style solid chemical dispenser used for filling pot & pan sinks and bus pans. Water not used for dissolving chemical is diverted and mixed with the chemical output below the bowl. This unit comes fully assembled and ready to install – just add your inlet fitting and water supply and adjust your set-screw. The ProBowl is cost effective and tamper proof – the set screw used for adjusting chemical concentration is easily adjusted out of view from the end-user.

- Built standard with ASSE approved chrome vacuum breaker
- Used in Pot & pan sinks and bus pan applications
- Private label logo available
- Standard Colors Grey, Blue, and Red
- Custom Colors available
